Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,274,520 to Cordell in view of U.S. Pat. No. 4,052,243 to Yazawa et al.

Claims 1 and 3-4, Cordell discloses a waterproof fabric that is employed on a healthy bed for nursing (col. 2 lines 45-50), which is characterized in its bed body being a fabric which is woven by waterproof fiber strands and has meshes (col. 3 lines 34-44). Cordell is silent to employing warps and wefts in a reticular material. Yazawa discloses a reticular material constructed from warps and wefts that are fastened and coated with a glue (col. 4-5 lines 65-68 & 1-2). It would have been obvious for one having ordinary skill in the art at the time of the invention to manufacture the woven materials with warps and wefts that are glued in order to form a reticular glue membrane thereon (col. 5 lines 1-2). Cordell also fails to disclose the meshes are longer than or equal to diameters of warps and wefts and should be shorter than 30 times of diameters of warps and wefts. It is considered an obvious modification to alter the dimensions of the meshes and it would have been obvious for one having ordinary skill in the art at the time of the

invention to employ the dimensions as stated above in order to provide an alternative design for the meshes.
